

Erykeh
office furniture

● Introduction to a variety of products

Using the best raw materials and using modern industrial machinery, Erykeh Company offers the following products to international markets in compliance with international standards.

● Office chair

This product has an ergonomic design and very high elasticity, which is quite suitable for the curvature of the waist. The construction of the Erykeh office chair provides the user with a comfortable sitting position to help him experience a calm and tireless state during long working hours. Moreover, the special design of Erykeh chairs can cause the pressure to dissipate, resulting in proper blood circulation and the prevention of muscle fatigue. One of the capabilities of this product is its adjustability up to 30 degrees based on the height of both the table and the user. Moreover, in the wheeled model of this product the user can easily move the chair on different surfaces and floors; as it has a rotating capability of up to 360 degrees and durable wheels, it leads to more freedom of action.

● **Management chair**

Management chair, according to advanced ergonomic principles, is a special type of office chair products suited for conference rooms, meetings and all types of offices. The cover of this product is made of polyurethane leather in various colors and the foam material used in it is cold foam with elasticity and high durability. This product is equipped with a pneumatic height adjuster, slope lock and soft-moving wheels, giving the user the comfort and a feeling of value.

● **Waiting chair**

Erykeh waiting chair is based on the design of fixed office chairs taking strength and economy into consideration. This product meets international standards in terms of safety and durability, and due to the use of thick backs and cushions, as well as high-quality coatings, it is suitable for continuous use and application in various environments featuring a long lifespan.

● Training chair

Single training chair features special folding handle for positioning stationery and laptop, with a metal base that boasts a high stability. The cushioned seat of this chair is suitable for people of different ages and brings comfort for the user when using it.

● **Amphitheater seat**

This product is designed for conference halls, theaters and cinemas. For the convenience of most consumers, the cushion and back of the chair are made of high-density natural sponge. The seat of this chair is larger than other chairs and creates a better feeling and less fatigue for the user when performing a show or holding a ceremony. Special springs for folding the chair are of high quality with high-durability.

● Office sofa set

Designed and produced for modern office decorations, Erykeh office sofas are perfectly manufactured, while withstanding heavy weights. It is interesting to note that high-density sponges are skin-friendly, making it breathable as they give the user a feeling of comfort, relieving fatigue and physical injuries altogether.

● Counter desk

This type of product is designed and produced in different sizes for the departments of reception, sales, information and Response Service, etc. in hospitals, companies, universities, museums, stores, etc. The wood used in the body of the table is one of the highest-quality woods in the market and is made of high-quality thermal laminate veneer in different colors.

● **Manager's Desk**

Erykeh manager desk is one of the most up-to-date management desks on the market. This type of desk consists of two separate sets, suggesting more freedom of action in the office layout as well as more efficiency. The side of the table has a three-slide file and a cupboard designated to hold your necessary items. Other features of this product include patterned MDF laminate, making it more durable as well as creating a lovely working environment. Serving as a safe with encrypt drawers, Erykeh manager desks are suitable for having wireless charger on. Additionally, you can change the height of the desk stand as the mood takes you.

● Office desk

Erykeh office desks, like other Erykeh items, are designed and produced based on ergonomic principles and structures, and due to the application of patterned laminated MDF wood, they have become beautiful, elegant, modern, and at the same time durable and strong products. Erykeh office desks are manufactured in one-piece and two-piece types and in 4 different sizes:

140 * 75 * 76 cm

160 * 75 * 76 cm

180 * 75 * 76 cm

200 * 75 * 76 cm

● **Conference table**

Conference tables, like other Erykeh products, are designed to transform the conference and meeting room space into a modern, stylish and different environment. Providing the conditions for installing panel sockets, connecting and transferring all types of power cables, telephones and networks, and adjusting the height through the durable bases used in the product, have made the product unique and practical.

● Packaging

Erykeh products are packaged in assembled and unassembled form, giving customers the chance to place orders and receive products according to their needs. Along with all the products, a manual is provided and our experts in Erykeh Customer's Support Unit are ready to answer any queries and provide the necessary guide on the types of Erykeh products. Furthermore, new packaging methods are utilized to maintain product quality over long distances. For more information and advice on how to package and deliver your orders in different quantities whether internationally or domestically, you can contact Erykeh experts.
